

Configuring your device to connect to UniWireless

Wireless setup: Preferably your computer needs to be set to communicate using 802.11a or 802.11g networking. 802.11b and 802.11n (draft) are not supported and have not been tested.

TCP/IP: Using DHCP

Security:

Authentication	Encryption
WPA (minimum requirement)	TKIP
WPA2	AES

EAP Type: Protected EAP (PEAP)

Authentication Method: Secured password (EAP-MSCHAP v2)

Proxies:

Automatic Configuration Script	Manual Configuration
www.unimelb.edu.au/cgi-bin/proxy.pac	1. Set your proxy to wwwproxy.student.unimelb.edu.au 2. Set your port to 8000 3. Add *. unimelb.edu.au to the 'bypass host or domain'
